

A1-217

Motion

Proposer: Cyprien BETTINI (DEFC)

Title: A1-217 to A1new5: JEF Europe Code of Conduct

Motion text

Insert from line 218 to 219:

8. The Contact Persons shall be appointed and trained ahead of the event or activity in question;

8.A. The Contact Persons are advised to remain vigilant during the entirety of the event, by reducing as much as possible their consumption of alcohol and/or other substances that may affect their cognitive capabilities.

Reason

Not necessarily to adopt this amendment but I think we need to discuss the place of alcohol in JEF events, especially for people in responsibility. I know it is already difficult to find Contact persons during events, but I had several experiences in the past where some participants experienced troubles (whether being too drunk or undergoing SA) while some people in position not being able to take care of them because being drunk. I think that beyond contact persons, it is our collective responsibility to stay vigilant/present of mind if someone is experiencing harassment/SA/other discomforts.
